GB

Lean Six Sigma

Green Belt

YOUR NEEDS

- A more in-depth understanding of LSS tools and skills
- Ability to undertake more detailed improvement projects over extended periods

OBJECTIVES

Gain insight into the following topics:

› Introduction to Lean Six Sigma (LSS)
› Process mapping and basic value stream analysis
› Waste analysis
› Visual management & 5S
› Voice of the customer
› Rapid improvement/Kaizen
› Stakeholder engagement
› Communication
› Project management
› Basic team building
› Data collection and analysis

WHO IS IT AIMED AT

Anyone who wants to increase their knowledge of LSS and undertake more advanced projects

PREREQUISITES

Having previously undertaken Yellow Belt training would be an advantage but not essential

BENEFITS TO YOUR ORGANISATION

› Adoption of skills, tools and techniques from the Lean Six Sigma toolset
› Ability to deploy LSS on small to medium projects, where the solutions are not immediately known
› Fast positive impact on your business and your processes
› Accredited Certification via the British Quality Foundation

5 DAY PROGRAMME

This 5 day course addresses Lean Six Sigma in more depth than Yellow Belt training.
Having introduced the synergies of both Lean and Six Sigma, we explore variation in all forms within processes. We then use this information to look at the capability of your processes compared to customer specifications.
With an emphasis on listening to the Voice of the Customer (VOC) and through the use of real-life case studies, we look at how the DMAIC framework can be used to ensure that customer requirements are met.
The training also covers a number of established Lean principles, and the fundamentals of statistics to deliver process and service flow so as to optimise operations.

Price : £1,650pp + VAT
